IMPORTANT

Do not post any chibis made here without considerable and original edits. I have a feeling this'll be spammed once it releases but remember that if it does chibis may end up being further restricted by rule 1b. If you want chibis to stay on the sub, please, restrain yourself from just slapping together a few options and posting "Lookie dis funni chibi I made XD". Add a background, put some funny text boxes, then we're sorted.

HOW TO MAKE CHIBIS

FOR DUMMIES EDITING

The first thing you'll need to make this work properly is an editing program, one that uses layers. I'd highly recommend GIMP 2 since it's free, it's pretty much MS Paint on steroids, and it's the only program I know that know works as expected. You could use Paint.net, Photoshop etc, but if you're not experienced, just get GIMP. (paint.net is better – NormallyAverage)

Once you've gotten your program sorted, all you need to do is go through the files (preferably in the numbered order) and drag in what you want, but the important thing is you have to **always start with the base.png file**

 base

unless you're doing the side head of Yuri which is in her hair folder.

When your chibi is looking the way you want just merge all the layers or save the picture separately.

RESOLUTIONS

The chibis are about 1844x1844 but I've expanded the alpha channels to 3000x3000 to fit

in any potential large objects such as signs, blankets, hats etc. If you're going to scale them down to fit the normal game's backgrounds (1280x720) then I'd suggest trying 500x500.

WANT TO MAKE YOUR OWN PARTS?

If you'd like to make your own parts to be included in the pack then feel free to link them in the comments of the release post and I'll see what I can do. There are base versions of

the head body and eyes as well as an eye colour palette if you want to edit existing chibis.

Keep in mind that "user chibis" probably won't get supported because they're not iconic

like the main characters and people could easily make slanderous media. If you want to

make addon packs or something for those then sure, I can't do anything to stop that,

but they won't be supported by the official pack.

FUTURE PLANS

If I decide to keep on improving this pack then I think I'll go in the "Disney Infinity" route, like adding a new franchise of chibis every major update. The two I'd probably do first in that system is Katawa Shoujo and RWBY.

And that's all for now see you next time!
